

### **End Times Session 15 – Daniel 11 (the king of the north and the king of the south)**

In this final session Pastor Bruce returns to the book of Daniel, chapter 11, where we are provided a very detailed account of the king of the north and the king of the south. Much of chapter 11 concerned events that took place many years ago. This fact allows us to research and verify the accuracy of Daniel's prophecy! Today we are primarily concerned with the passage from verse 40-45, that begins with the phrase, "At the time of the end..."

Why does Pastor Bruce think this passage has Eschatological significance?

What modern countries make up the region of the kings of the north and south?

How should we interpret verses 44-45?

As a follow up, Pastor Bruce speculates on some of the details regarding key characters and events of the End Times. How would you describe this speculation?
